(a)
fixed shot budget, $L = 4$
noiseless
AD
Pauli twirl
depolarizing
test accuracy
shots per image N_s
(b)
exact training
Pauli twirl
depolarizing
AD
noiseless
shot cost relative to noiseless
number of re-uploading layers L
(c)
trained with $N_s = 10^3$ shots
Pauli twirl
depolarizing
AD
noiseless
number of re-uploading layers L
